

Sofiia Matsiutsia

Senior Product and UX Designer

8 years of experience in **Product Design / UX**. Bachelor's degree, System Analysis and Cybernetics. Have been working with AI and ML **capabilities and limitations** in interfaces since 2019.

Co-Founder & Design Lead – [Vibe Coding Collective](#)

2025 – Present | HQ in London (+10 countries)

- **Co-created** and **interdisciplinary** leading the **global non-profit community** for people outside the tech world, **making AI accessible to all** through live, human-first events.
- Running **events in 10 countries** (Osaka, London, Amsterdam, Berlin, Mumbai, New York, Florida, Edinburgh, Norwich, Kyiv).
- **Researching and teaching** the frontier practices of **human-AI collaboration workflows**. Advocating for teaching based cognitive abilities usage, rather than just prompting.
- **Field user research** using tools (ElevenLabs, Lovable, Replit, v0) and sharing with companies the suggestions on improvements.
- Delegate responsibilities to a team of 6 volunteers and partner with 10+ city leads, including MIT and Harvard student organisations.
- Researching frontier **AI experience design patterns** that shape how technology is built.

Senior Product Designer – [HousingAnywhere](#)

2022 – 2025 | Kyiv – Rotterdam; contract concluded after relocating to London

- Led the research and design for the **AI-powered search**, and search result overview, based on the latest **AI HCI field research** on malleable, and Intent-Driven UI.
- Led the **0→1 design** of the internal platform, merging 5 tools into one **scalable system** for 5 complex teams (sales, marketing, customer experience, finance, devs) for reducing cognitive load and time to finish the tasks. Built the business case with KPIs that persuaded **executive leaders** to invest time in development.
- Achieved saving **30+ hrs/week**, and manual work **–75%** and for internal teams with automated features for the new internal platform.
- Led **field user research** of the internal teams processes (shadowing, card sorting, interviews, questionnaires) to build the internal platform based on **deep human factors** & workflow understanding. Mapped root causes and bottlenecks across 10+ flows by Blueprint and BPMN notations.
- Redesigned the **hero product's** landlord ID verification experience by utilising the best UX patterns of the gamified approach. Drove completion rates **+25%**.
- Led the **high-impact launch** of the redesigned payout experience for the **hero product**, impacted thousands landlords worldwide.
- **Collaborated with** Product Owners, developers, and **cross-functional** stakeholders advocating for human centered decisions of internal teams.
- **Collaborated with developers** for translating designs into **design systems**, built from scratch on a tokenised approach. Co-building components in Storybook.
- Advocated and shared the new **UX AI practices** with the design team on weekly syncs.

Founding Product AI Designer – [TeamLift](#)

2022 – 2023 | Consulting project

- **Led the 0→1 design vision, research, and strategy** for an internal talent mobility platform, building a single-source-of-truth system powered by a **skills-graph ML engine**, that contributed to the company's **successful fundraising** round.
- Collaborated closely with the **Head of AI and team leads** to **establish novel human-AI UX patterns**, effectively translating ML capabilities and limitations into intuitive user experiences.
- Concluded the product development engagement following TeamLift's strategic pivot from **SaaS development** to **B2B AI educational services**.

AI & HCI

Human-AI interactions

AIUX repertoire: trust calibration, Intent-driven UX, Malleable UI, chat interface

Machine learning capabilities and limitations translated into UX

AI-assisted prototyping Google AI Studio, Antigravity, Figma MCP, Claude Code

DESIGN & RESEARCH

User-centered / human-centered design, UX excellence

Usability principles, human factors, accessibility

Qualitative user research: field study, interviews, shadowing, card sorting, usability testing,

Quantitative: targeted experiments (A/B tests), behavioral analytics (Google Analytics, Mixpanel)

Root-cause analysis & service-blueprint mapping

Progressive disclosure

Wireframes,, interactive prototypes

Interaction patterns, information architecture, data visualisation (live charts, maps)

Design systems & scalable UI components (tokenised)

Collaborating with engineering teams: code-connected workflows (Figma Dev, Storybook)

HTML, CSS, JavaScript

LEADERSHIP

Leading design projects end-to-end in **complex, cross-functional organizations**, and nimble, interdisciplinary teams

Working with executive leaders (C-levels); stakeholder alignment (Engineers, POs, Marketing, etc.)

Roadmap influence through advocacy for users' needs; navigating ambiguity

Public speaking, workshop facilitation
Agile (Jira, Confluence, Notion)

EDUCATION

- BSc Systems Analysis, Kyiv Polytechnic Institute
- MSc Marketing, Kyiv NUFT University
- Data Mining in Analytics
- BPMN Notations
- Storytelling for Influence, IDEO

LANGUAGE

- English (Advanced)
- Japanese (N4)
- Ukrainian (Native)

Senior Product Designer – ex Flatfy ([LUN](#))

2021 – 2022 | Kyiv | Resigned due to the full scale invasion in Ukraine

- Led the design for the most popular long-term aggregator platform in Ukraine with **5-10 million users/monthly** (pre-war times).
- Drove the design & launch of the filter suggestion feature through **targeted experiments**, driving filter usage **+19%**, and eCommerce rate **+3.6%**.
- Collaborated with the Data Science team to translate **AI confidence level** into the design and **Trust Calibration of AI features** (ads duplicates, scam ads identification).
- Translated quantitative data from Google Analytic, A/B tests, NPS surveys, and qualitative from interviews, and Zendesk inquiries to drive breakthrough experiences rooted in human needs.
- Led the **nimble cross-functional team** as Product Owner for three months, partnering with the **CEO** and Team Lead to prioritize high-ROI features alongside advocating for users' experience.

Product Designer – [90POE](#) / Zodiac Maritime

2019 – 2021 | London — Kyiv

- Led the **0→1 design** for the leading maritime industry real-time fleet operations dashboard. Designed the one-source-of-truth, reducing cognitive load and the time it takes fleet operators to make decisions hours → seconds.
- Led **field qualitative research** with vessel captains and crew (onsite in London + remote). **Collaborated with engineers** to map operators' flow. Designed **targeted experiments** to ensure the mental model alignment, and **human factors**.
- Built the chart/compass/live-data/map components for the tokenised **design system** in Figma.
- Initiated the knowledge exchange with the Data Science team to understand **ML capabilities & limitations** for bringing vessels' Digital Twins data into the platform.

UX Designer – Sterling Web Agency

2018 – 2019 | Kyiv

Designed websites for client projects, presented directly to clients and prospects.
